Follow these instructions if you are top-mounting your Aguzzo sink into a bench.

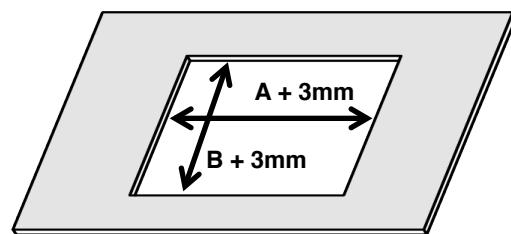

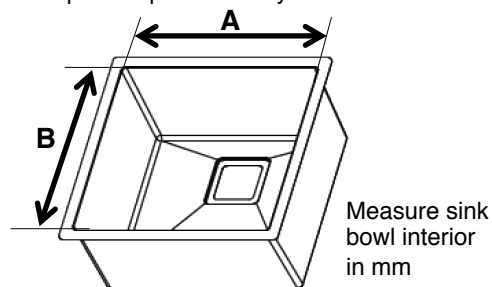

NOTE - All Aguzzo topmount sink installations use these instructions. Therefore images may differ from your sink model. Ensure your sink is in perfect condition before installation

Installation components

Description	Quantity
A Stainless Steel Sink	1
B Box of hole plugs, anchor clips and bolts	1

Step 1 – Preparing Benchtop

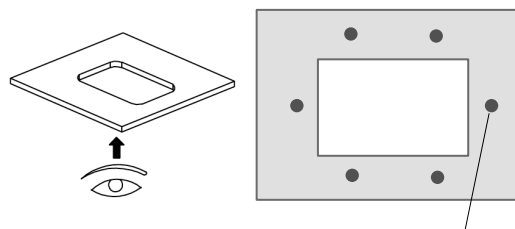

A template is provided or you can create one

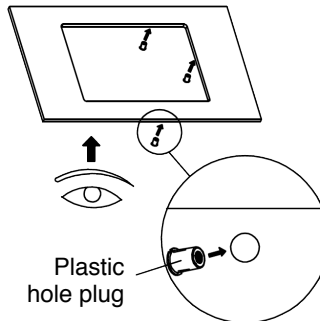

Cut hole in benchtop as per above. Match bench hole corner style to sink, i.e. round corners for round cornered sink

Step 2 – Prepare mounting holes

Look underneath bench hole and measure and mark the mounting hole positions in the bench (SEE SUPPLIED TEMPLATE)

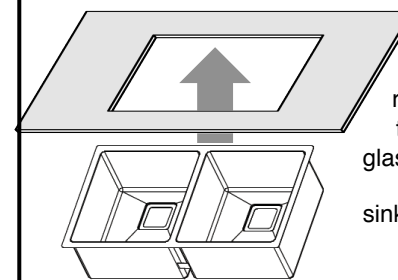

Drill $\phi 10\text{mm}$ holes 15mm deep underneath bench as per supplied template

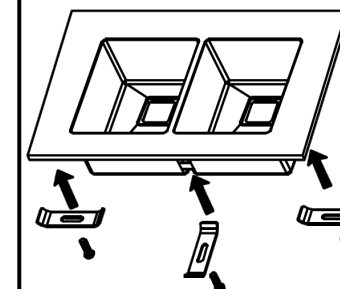

Insert supplied plastic plugs into drilled mounting holes

Step 3 – Affix Sink Under Bench

Position sink under bench in line with hole

It is recommended that a suitable glass adhesive is applied when sink is positioned

Affix the sink firmly by fastening the clips and bolts into the mounting holes. **Important:** See supplied template for order of affixing clips
